

Topsoil

Key Benefits

- A rich, sandy loam rich in minerals and organic matter
- A pH neutral double sifted topsoil

Application

- Native based Rootzone for athletic field construction
- Use after construction in areas where natural topsoil has been removed and landscape needs to be replanted
- Works well in vegetable gardens, flower beds, to dress up problem areas, or to renovate your entire lawn

Typical Analysis

Sand	70%
Silt	20%
Clay	10%
Moisture.....	30.2%
Organic Matter	4-6%
Soil pH	6.89
Potassium	5.2%
Magnesium	25%
Calcium	56.3%
Hydrogen.....	13.8%
USDA Classification	Sandy Loam
Soluble Salts	0.6 ms/cm
Acidity	0.7meq/100g
Cation Exchange Capacity.....	9.2 meq/100g
